## NetSci-X 2020: Keynote/Invited and Parallel Sessions Talk Schedule

Room	Theme	Authors	Title
Keynote/Invited [Mo	nday Jan. 20, 2020	9:10-10:40]	Chair: Hiroki Sayama, Junichi Yamanoi
Ibuka Auditorium (1F)	Keynote	Katy Börner	Network models and visualizations of education, scientific, and job market developments
	Invited	Joe Labianca	
Contributed Session	n 1 [Monday Jan. 20	), 2020 11:10-12:30]	Chair: TBA
Ibuka Auditorium (1F)	Economic and Financial	Irena Vodenska, Nima Dehmamy, Alexander Becker, Sergey Buldyrev, Shlomo Havlin, and Gene Stanley	Vulnerability of interconnected financial networks
		Takayuki Mizuno, Shohei Doi, and Shuhei Kurizaki	Visualizing indirect influence of China in global shareholding networks
		Kimihiro Nakaga, Koji Eguchi, Takayuki Mizuno, and Atsuhiro Takasu	Embedding and predicting supply-chain networks
		Mayu Furukawa, Tomomi Kito, Junichi Yamanoi, and Hiroki Sayama	An integrated index for product & customer diversification strategies
Meeting Room 1 (3F)	Network Structure 1	Quoc Hoan Tran, Van Tuan Vo, and Yoshihiko Hasegawa	Scale-variant topological portraits of complex networks
		Takayuki Hiraoka and Koji Oishi	Genealogical network analysis of social group evolution
		Liao Fuxuan and Yukio Hayashi	A new relation of k-shell and feedback vertex set
		Vaiva Vasiliauskaite, Tim Evans, and Paul Expert	The hidden treasures of acyclic graphs: diamonds
Meeting Room 2 (3F)	Temporal	Hartmut Lentz, Andreas Koher, James Gleeson, and Philipp Hövel	Epidemic spreading on temporal networks - a contact-based model
		Radosław Michalski, Jaroslaw Jankowski, and Piotr Bródka	Sequential seeding in temporal networks
		Kashin Sugishita, Mason Porter, Mariano Beguerisse- Diaz, and Naoki Masuda	Opinion dynamics in tie-decay networks
		Maddalena Torricelli, Márton Karsai, and Laetitia Gauvin	Event embedding for temporal networks
Meeting Room 3 (3F)	Brain	Hardik Rajpal, Matthew Fredericks, Pedro Mediano, Fernando Rosas, Stefan Brugger, and Henrik Jeldtoft Jensen	Network and other higher order measures in the brain: lessons from a study of schizophrenia
		Makoto Fukushima and Kenji Leibnitz	Simulating packet-based communication on brain structural networks
		Tommaso Gili, Andrea Gabrielli, Guido Caldarelli, Fabrizio Piras, Gianfranco Spalletta, and Rossana Mastrandrea	Functional brain network topology maps the dysfunctional substrate of schizophrenia
		Hao Wang and Linyuan Lü	Higher-order morphorspace in individual myelin-based brain network
Invited [Monday Jar	ı. 20, 2020 14:00-1	4:30]	Chair: Guido Caldarelli
Ibuka Auditorium (1F)	Invited	Misako Takayasu	Modeling of the business transaction network in Japan and its practical applications
Contributed Session	n 2 [Monday Jan. 20	), 2020 14:40-16:00]	Chair: TBA
Ibuka Auditorium (1F)	Social	Guido Caldarelli, Rocco De Nicola, Fabio Del Vigna, Marinella Petrocchi, and Fabio Saracco	The role of bot squads in the political propaganda on Twitter
		Amirhossein Farzam, Parham Moradi, Zahra Padar, Mahdi Sarikhani, and Kosar Karimipour	Collective identity and social bots in Farsi Twitter

		Jia-Rong Xie, Gang Yan, Jiachen Sun, Xiao Ma, and Yanqing Hu	Unexpectedly high capacity and extremely unbalanced discursive power of social media networks to spread information
		Diego Fregolent Mendes de Oliveira and Kevin S. Chan	Competition and spreading of low and high quality information in online social networks
Meeting Room 1 (3F)	Network Structure 2	Ignacio Morer, Alessio Cardillo, Albert Diaz-Guilera, Luce Prignano, and Sergi Lozano	Comparing spatial networks: a 'one size fits all' efficiency-driven approach
		Malbor Asllani	Indetermination of networks structure from the dynamics perspective
		Serafino Matteo, Giulio Cimini, Amos Maritan, Samir Suweis, Jayanth Banavar, and Guido Caldarelli	Scale-free networks revealed from finite-size scaling
		Pim van der Hoorn, Dmitri Krioukov, Gabor Lippner, and Will Cunningham	Ollivier curvature in random geometric graphs on Riemannian manifolds
Meeting Room 2 (3F)	Synchrony and Dynamics	Ilja Rausch, Yara Khaluf, and Pieter Simoens	Network motifs and collective decision-making
		Young Sul Cho	Concurrent formation of nearly synchronous clusters in each intertwined cluster set with parameter mismatches
		Per Sebastian Skardal and Alex Arenas	Higher-order interactions in complex networks of phase oscillators promote abrupt synchronization switching
		Hiroshi Kori	Noise stability and persistence of synchrony in a power grid model
Meeting Room 3 (3F)	Biological and Chemical	Boris Podobnik, Dean Korosak, Masa Skelin Klemen, Andraz Stozer, Jurij Dolensek, Marjan Slak Rupnik, Plamen Ch. Ivanov, Petter Holme, and Marko Jusup	B-cells operate collectively to help maintain glucose homeostasis
		Alessandro Muscoloni, Ilyes Abdelhamid, and Carlo Vittorio Cannistraci	Local-community network automata modelling based on length-three-paths for prediction of complex network structures in protein interactomes and food webs
		Takashi Okada, Je-Chiang Tsai, and Atsushi Mochizuki	Origin of adaptation and modularity in chemical reaction networks
		Wilmer Leal, Eugenio Llanos, Andrés Bernal, Guillermo Restrepo, Duc Luu, Juergen Jost, and Peter F. Stadler	Exploring the hypergraph structure underlying the chemical space
Keynote/Invited [Tu	esday Jan. 21, 2020	9:00-10:30]	Chair: Jesus Gómez-Gardeñes
Ibuka Auditorium (1F)	Keynote	Meeyoung Cha	
	Invited	Petter Holme	The big science of small networks
Contributed Session	n 3 [Tuesday Jan 21		
	in o [racsaay can. 2	, 2020 11:00-12:20]	Chair: TBA
Ibuka Auditorium (1F)		Riccardo Gallotti, Giulia Bertagnolli, and Manlio De Domenico	Chair: TBA  Disentangling activity-aware human flows reveals the hidden functional organization of urban systems
Ibuka Auditorium (1F)		Riccardo Gallotti, Giulia Bertagnolli, and Manlio De	Disentangling activity-aware human flows reveals the
Ibuka Auditorium (1F)		Riccardo Gallotti, Giulia Bertagnolli, and Manlio De Domenico	Disentangling activity-aware human flows reveals the hidden functional organization of urban systems  Multilayer stochastic block model: how do transportation
Ibuka Auditorium (1F)		Riccardo Gallotti, Giulia Bertagnolli, and Manlio De Domenico Antonia Godoy-Lorite, Roberto Murcio, and Elsa Arcaute	Disentangling activity-aware human flows reveals the hidden functional organization of urban systems  Multilayer stochastic block model: how do transportation options drive commuters in london?  Characterising road networks through subgraph graphlet
Ibuka Auditorium (1F)  Meeting Room 1 (3F)	Urban	Riccardo Gallotti, Giulia Bertagnolli, and Manlio De Domenico  Antonia Godoy-Lorite, Roberto Murcio, and Elsa Arcaute  Andrew Elliott, Stephen Law, and Luis Ospina-Forero  Sakil Chowdhury, Laurent Hébert-Dufresne, and Jeff	Disentangling activity-aware human flows reveals the hidden functional organization of urban systems  Multilayer stochastic block model: how do transportation options drive commuters in london?  Characterising road networks through subgraph graphlet analysis  Effective implementation of energy aware polarization

		John Ring, Jean-Gabriel Young, and Laurent Hébert- Dufresne	Connected graphs with a given degree sequence: efficient sampling, correlations, community detection and robustness
		Jung-Ho Kim and Kwang-II Goh	K-selective percolation on complex networks
Meeting Room 2 (3F)	Dynamics 1	Takuma Narizuka and Yoshihiro Yamazaki	Burstiness for adjacency relationships in a Vicsek model
		Huijuan Wang, Cunquan Qu, and Wioletta Ruszel	Self-avoiding pruning random walk on signed network
		Sungmin Lee, Kyu-Min Lee, and Kwang-II Goh	Emergent complexity in dynamics on signed networks
		Guilherme Ferraz de Arruda, Giovanni Petri, and Yamir Moreno	Social contagion models on hypergraphs
Meeting Room 3 (3F)	Epidemic	Li Pi, Ceire Costelloe, and Paul Expert	Exploring carbapenem resistant enterobacteriaceae infections in imperial college healthcare trust: a network analysis using individual patient movement data
		Daniela Perrotta, Enrique Frias-Martinez, Miguel Luengo- Oroz, Daniela Paolotti, Michele Tizzoni, and Alessandro Vespignani	Harnessing cell phone traces to model the spread of Zika in Colombia
		S. Jalil Kazemitabar and Arash A. Amini	Approximate identification of the optimal epidemic source in complex networks
		Minjae Jo, Bukyoung Jhun, and Byungnam Kahng	Hybrid phase transition of simplicial SIS model in scale-free uniform hypergraph
Invited [Tuesday Ja	n. 21, 2020 13:50-	14:50]	Chair: Naoki Masuda
Ibuka Auditorium (1F)	Invited	Shlomo Havlin	Some applications of network science
	Invited	Byungnam Kahng	
Contributed Session	n 4 [Tuesday Jan. 2	1, 2020 15:20-16:40]	Chair: TBA
Contributed Session Ibuka Auditorium (1F)		1, 2020 15:20-16:40]  Michael Park and Russell Funk	Chair: TBA  A first look at the relationship between the network of lobbying and innovation in high-tech industries
			A first look at the relationship between the network of
		Michael Park and Russell Funk	A first look at the relationship between the network of lobbying and innovation in high-tech industries  Patent opposition network: adversarial interactions of
		Michael Park and Russell Funk  Nagi Moriya, Tomomi Kito, and Junichi Yamanoi  Andrea Zaccaria, Lorenzo Napolitano, Emanuele	A first look at the relationship between the network of lobbying and innovation in high-tech industries  Patent opposition network: adversarial interactions of companies and trend of innovation  Firms' complexity: technological coherence,
	Innovation	Michael Park and Russell Funk  Nagi Moriya, Tomomi Kito, and Junichi Yamanoi  Andrea Zaccaria, Lorenzo Napolitano, Emanuele Pugliese, and Luciano Pietronero	A first look at the relationship between the network of lobbying and innovation in high-tech industries  Patent opposition network: adversarial interactions of companies and trend of innovation  Firms' complexity: technological coherence, performance, and forecasting  Using network science to understand student pathways
Ibuka Auditorium (1F)	Innovation	Michael Park and Russell Funk  Nagi Moriya, Tomomi Kito, and Junichi Yamanoi  Andrea Zaccaria, Lorenzo Napolitano, Emanuele Pugliese, and Luciano Pietronero  Dion O'Neale, Steven Turnbull, and Kirsten Locke	A first look at the relationship between the network of lobbying and innovation in high-tech industries  Patent opposition network: adversarial interactions of companies and trend of innovation  Firms' complexity: technological coherence, performance, and forecasting  Using network science to understand student pathways in and through STEM education
Ibuka Auditorium (1F)	Innovation	Michael Park and Russell Funk  Nagi Moriya, Tomomi Kito, and Junichi Yamanoi  Andrea Zaccaria, Lorenzo Napolitano, Emanuele Pugliese, and Luciano Pietronero  Dion O'Neale, Steven Turnbull, and Kirsten Locke  Nima Dehmamy, Albert-László Barabási, and Rose Yu  Jean-Gabriel Young, George T. Cantwell, and M. E. J.	A first look at the relationship between the network of lobbying and innovation in high-tech industries  Patent opposition network: adversarial interactions of companies and trend of innovation  Firms' complexity: technological coherence, performance, and forecasting  Using network science to understand student pathways in and through STEM education  Learning network structure using graph convolutional networks  Efficient and fully bayesian inference of complex
Ibuka Auditorium (1F)	Innovation	Michael Park and Russell Funk  Nagi Moriya, Tomomi Kito, and Junichi Yamanoi  Andrea Zaccaria, Lorenzo Napolitano, Emanuele Pugliese, and Luciano Pietronero  Dion O'Neale, Steven Turnbull, and Kirsten Locke  Nima Dehmamy, Albert-László Barabási, and Rose Yu  Jean-Gabriel Young, George T. Resilience  Yang Lou, Guanrong Chen, and Lin Wang  Towards optimal robustness of network controllability: empirical necessary condition on node degrees  Sergio Faci-Lázaro, Jordi Soriano Fradera, and Jesus Gomez-Gardeñes  Yamir Moreno  Biodiversity and structural stability of multilayer ecological networks  Invited [Wednesday Jan. 22, 2020 13:50-14:20]  Chair: Hiroki Sayama  Ibuka Auditorium (1F) Invited  Manlio De Domenico			Michael Small and Debora Correa	Testing networks from time series: when is a network an adequate description of nonlinear dynamics?
Sergio Faci-Lázaro, Jordi Soriano Fradera, and Jesus Gomez-Gardeñes  Yamir Moreno  Biodiversity and structural stability of multilayer ecological networks  Invited [Wednesday Jan. 22, 2020 13:50-14:20]  Chair: Hiroki Sayama  Ibuka Auditorium (1F) Invited  Manlio De Domenico	Meeting Room 3 (3F)		Romeil Sandhu and Ji Liu	Maxwell's demon: controlling entropy via discrete Ricci flow over networks
Gomez-Gardeñes  Yamir Moreno  Biodiversity and structural stability of multilayer ecological networks  Invited [Wednesday Jan. 22, 2020 13:50-14:20]  Chair: Hiroki Sayama  Ibuka Auditorium (1F) Invited  Manlio De Domenico			Yang Lou, Guanrong Chen, and Lin Wang	Towards optimal robustness of network controllability: an empirical necessary condition on node degrees
Invited [Wednesday Jan. 22, 2020 13:50-14:20] Chair: Hiroki Sayama  Ibuka Auditorium (1F) Invited Manlio De Domenico				Functional resilience of cultured neuronal networks
Ibuka Auditorium (1F) Invited Manlio De Domenico			Yamir Moreno	
	Invited [Wednesday	Jan. 22, 2020 13	:50-14:20]	Chair: Hiroki Sayama
Contributed Session 6 [Wednesday Jan. 22, 2020 14:30-15:50] Chair: TBA	Ibuka Auditorium (1F)	Invited	Manlio De Domenico	
	Contributed Session	n 6 [We <u>dnesday Ja</u>	ın. 22, 2020 14:30 <u>-15:50]</u>	Chair: TBA

Ibuka Auditorium (1F) Success	Marc Santolini, Leo Blondel, Abhijeet Krishna, Emma Barme, Megan Palmer, and Albert-László Barabási	A large scale analysis of collaboration and innovation in an international science and engineering competition
	Orsolya Vasarhelyi, Igor Zakhlebin, Stasa Milojevic, and Agnes-Emoke Horvat	Gender diversity in collaboration networks and the online popularity of scientists
	Taekho You, Jinseo Park, June-Young Lee, Jinhyuk Yun, and Woo-Sung Jung	Comparing quality of questionable journals in academic ecosystem
	Riccardo Gallotti and Manlio De Domenico	Collective effects of individual decisions the case of the Nobel prize
Meeting Room 1 (3F) Embedding	Maksim Kitsak and Dmitri Krioukov	Cross-geometric framework for complementarity-driven networks
	Takeshi Hase and Masanori Shimono	Neural network embedding of real neuronal networks
	Olivier Guin, Roland Molontay, and Marcell Nagy	Comparing structural feature-based and graph embedding-based network classification methods
	Yanchen Liu, Nima Dehmami, and Albert-László Barabási	Topological characterization of 3D graph embedding landscapes using the graph linking number
Meeting Room 2 (3F) Cascade	Oriol Artime and Manlio De Domenico	Cascade-based attacks on multilayer networks
	Tomokatsu Onaga, Fabio Caccioli, and Teruyoshi Kobayashi	Modelling fire sales as heterostate dynamical processes on bipartite networks
	Yafei Zhang, Lin Wang, Jonathan Zhu, and Xiaofan Wang	The virality and growth of cascades
	Shaunette Ferguson, Sadamori Kojaku, and Teruyoshi Kobayashi	Diurnal dynamics of financial systemic risk
Meeting Room 3 (3F) Community	Andrew Elliott, Angus Chiu, Marya Bazzi, Gesine Reinert, and Mihai Cucuringu	Core–periphery structure in directed networks
	Vaiva Vasiliauskaite and Tim Evans	Making communities show respect for order
	Christopher Blöcker and Martin Rosvall	Mapping flow in bipartite networks
	Aditya Tandon and Santo Fortunato	Fast consensus clustering in complex networks
Keynote [Wednesday Jan. 22, 202	0 16:20-17:20]	Chair: Kwang-II Goh

Ibuka Auditorium (1F) Keynote

Albert-László Barabási
