NetSci-X 2020: Keynote/Invited and Parallel Sessions Talk Schedule

Room	Theme	Authors	Title		
Keynote/Invited [Mo	nday Jan. 20, 2020	9:10-10:40]	Chair: Hiroki Sayama, Junichi Yamanoi		
Ibuka Auditorium (1F)	Keynote	Katy Börner	Network Models and Visualizations of Education, Scientific, and Job Market Developments		
	Invited	Joe Labianca			
Contributed Session	n 1 [Monday Jan. 20), 2020 11:10-12:30]			
Ibuka Auditorium (1F)	Economic and Financial	Irena Vodenska, Nima Dehmamy, Alexander Becker, Sergey Buldyrev, Shlomo Havlin, and Gene Stanley	Vulnerability of interconnected financial networks		
Chair: Giu	ılio Cimini	Takayuki Mizuno, Shohei Doi, and Shuhei Kurizaki	Visualizing indirect influence of China in global shareholding networks		
		Kimihiro Nakaga, Koji Eguchi, Takayuki Mizuno, and Atsuhiro Takasu	Embedding and predicting supply-chain networks		
		Mayu Furukawa, Tomomi Kito, Junichi Yamanoi, and Hiroki Sayama	An integrated index for product & customer diversification strategies		
Meeting Room 1 (3F)	Network Structure 1	Quoc Hoan Tran, Van Tuan Vo, and Yoshihiko Hasegawa	Scale-variant topological portraits of complex networks		
Ch	air:	Takayuki Hiraoka and Koji Oishi	Genealogical network analysis of social group evolution		
		Liao Fuxuan and Yukio Hayashi	A new relation of k-shell and feedback vertex set		
		Vaiva Vasiliauskaite, Tim Evans, and Paul Expert	The hidden treasures of acyclic graphs: diamonds		
Meeting Room 2 (3F)	Temporal	Hartmut Lentz, Andreas Koher, James Gleeson, and Philipp Hövel	Epidemic spreading on temporal networks - a contact-based model		
Chair: Yohs	uke Murase	Radosław Michalski, Jaroslaw Jankowski, and Piotr Bródka	Sequential seeding in temporal networks		
		Kashin Sugishita, Mason Porter, Mariano Beguerisse- Diaz, and Naoki Masuda	Opinion dynamics in tie-decay networks		
		Maddalena Torricelli, Márton Karsai, and Laetitia Gauvin	Event embedding for temporal networks		
Meeting Room 3 (3F)	Brain	Hardik Rajpal, Matthew Fredericks, Pedro Mediano, Fernando Rosas, Stefan Brugger, and Henrik Jeldtoft Jensen	Network and other higher order measures in the brain: lessons from a study of schizophrenia		
Chair: Carlo Vitt	orio Cannistraci	Makoto Fukushima and Kenji Leibnitz	Simulating packet-based communication on brain structural networks		
		Tommaso Gili, Andrea Gabrielli, Guido Caldarelli, Fabrizio Piras, Gianfranco Spalletta, and Rossana Mastrandrea	Functional brain network topology maps the dysfunctional substrate of schizophrenia		
		Hao Wang and Linyuan Lü	Higher-order morphorspace in individual myelin-based brain network		
Invited [Monday Jan. 20, 2020 14:00-14:30]			Chair: Guido Caldarelli		
Ibuka Auditorium (1F)	Invited	Misako Takayasu	Modeling of the business transaction network in Japan and its practical applications		
Contributed Session 2 [Monday Jan. 20, 2020 14:40-16:00]					
Ibuka Auditorium (1F)	Social	Guido Caldarelli, Rocco De Nicola, Fabio Del Vigna, Marinella Petrocchi, and Fabio Saracco	The role of bot squads in the political propaganda on Twitter		
Chair: Irena	a Vodenska	Amirhossein Farzam, Parham Moradi, Zahra Padar, Mahdi Sarikhani, and Kosar Karimipour	Collective identity and social bots in Farsi Twitter		

	Jia-Rong Xie, Gang Yan, Jiachen Sun, Xiao Ma, and Yanqing Hu	Unexpectedly high capacity and extremely unbalanced discursive power of social media networks to spread information
	Diego Fregolent Mendes de Oliveira and Kevin S. Chan	Competition and spreading of low and high quality information in online social networks
Meeting Room 1 (3F) Network Structure 2	Ignacio Morer, Alessio Cardillo, Albert Diaz-Guilera, Luce Prignano, and Sergi Lozano	Comparing spatial networks: a 'one size fits all' efficiency-driven approach
Chair: Takayuki Hiraoka	Malbor Asllani	Indetermination of networks structure from the dynamics perspective
	Serafino Matteo, Giulio Cimini, Amos Maritan, Samir Suweis, Jayanth Banavar, and Guido Caldarelli	Scale-free networks revealed from finite-size scaling
	Pim van der Hoorn, Dmitri Krioukov, Gabor Lippner, and Will Cunningham	Ollivier curvature in random geometric graphs on Riemannian manifolds
Meeting Room 2 (3F) Synchrony and Dynamics	Ilja Rausch, Yara Khaluf, and Pieter Simoens	Network motifs and collective decision-making
Chair:	Young Sul Cho	Concurrent formation of nearly synchronous clusters in each intertwined cluster set with parameter mismatches
	Per Sebastian Skardal and Alex Arenas	Higher-order interactions in complex networks of phase oscillators promote abrupt synchronization switching
	Hiroshi Kori	Noise stability and persistence of synchrony in a power grid model
Meeting Room 3 (3F) Biological and Chemical	Boris Podobnik, Dean Korosak, Masa Skelin Klemen, Andraz Stozer, Jurij Dolensek, Marjan Slak Rupnik, Plamen Ch. Ivanov, Petter Holme, and Marko Jusup	B-cells operate collectively to help maintain glucose homeostasis
Chair: Tommaso Gili	Alessandro Muscoloni, Ilyes Abdelhamid, and Carlo Vittorio Cannistraci	Local-community network automata modelling based on length-three-paths for prediction of complex network structures in protein interactomes and food webs
	Takashi Okada, Je-Chiang Tsai, and Atsushi Mochizuki	Origin of adaptation and modularity in chemical reaction networks
	Takashi Okada, Je-Chiang Tsai, and Atsushi Mochizuki Wilmer Leal, Eugenio Llanos, Andrés Bernal, Guillermo Restrepo, Duc Luu, Juergen Jost, and Peter F. Stadler	
Keynote/Invited [Tuesday Jan. 21, 2020	Wilmer Leal, Eugenio Llanos, Andrés Bernal, Guillermo Restrepo, Duc Luu, Juergen Jost, and Peter F. Stadler	networks Exploring the hypergraph structure underlying the
	Wilmer Leal, Eugenio Llanos, Andrés Bernal, Guillermo Restrepo, Duc Luu, Juergen Jost, and Peter F. Stadler	networks Exploring the hypergraph structure underlying the chemical space
	Wilmer Leal, Eugenio Llanos, Andrés Bernal, Guillermo Restrepo, Duc Luu, Juergen Jost, and Peter F. Stadler 9:00-10:30]	networks Exploring the hypergraph structure underlying the chemical space
Ibuka Auditorium (1F) Keynote Invited	Wilmer Leal, Eugenio Llanos, Andrés Bernal, Guillermo Restrepo, Duc Luu, Juergen Jost, and Peter F. Stadler 9:00-10:30] Meeyoung Cha Petter Holme	networks Exploring the hypergraph structure underlying the chemical space Chair: Jesus Gómez-Gardeñes
Ibuka Auditorium (1F) Keynote Invited Contributed Session 3 [Tuesday Jan. 2	Wilmer Leal, Eugenio Llanos, Andrés Bernal, Guillermo Restrepo, Duc Luu, Juergen Jost, and Peter F. Stadler 9:00-10:30] Meeyoung Cha Petter Holme	networks Exploring the hypergraph structure underlying the chemical space Chair: Jesus Gómez-Gardeñes
Ibuka Auditorium (1F) Keynote Invited Contributed Session 3 [Tuesday Jan. 27]	Wilmer Leal, Eugenio Llanos, Andrés Bernal, Guillermo Restrepo, Duc Luu, Juergen Jost, and Peter F. Stadler 9:00-10:30] Meeyoung Cha Petter Holme 1, 2020 11:00-12:20] Riccardo Gallotti, Giulia Bertagnolli, and Manlio De	networks Exploring the hypergraph structure underlying the chemical space Chair: Jesus Gómez-Gardeñes The big science of small networks Disentangling activity-aware human flows reveals the
Ibuka Auditorium (1F) Keynote Invited Contributed Session 3 [Tuesday Jan. 2* Ibuka Auditorium (1F) Urban	Wilmer Leal, Eugenio Llanos, Andrés Bernal, Guillermo Restrepo, Duc Luu, Juergen Jost, and Peter F. Stadler 9:00-10:30] Meeyoung Cha Petter Holme 1, 2020 11:00-12:20] Riccardo Gallotti, Giulia Bertagnolli, and Manlio De Domenico	networks Exploring the hypergraph structure underlying the chemical space Chair: Jesus Gómez-Gardeñes The big science of small networks Disentangling activity-aware human flows reveals the hidden functional organization of urban systems Multilayer stochastic block model: how do transportation
Ibuka Auditorium (1F) Keynote Invited Contributed Session 3 [Tuesday Jan. 2* Ibuka Auditorium (1F) Urban	Wilmer Leal, Eugenio Llanos, Andrés Bernal, Guillermo Restrepo, Duc Luu, Juergen Jost, and Peter F. Stadler 9:00-10:30] Meeyoung Cha Petter Holme 1, 2020 11:00-12:20] Riccardo Gallotti, Giulia Bertagnolli, and Manlio De Domenico Antonia Godoy-Lorite, Roberto Murcio, and Elsa Arcaute	networks Exploring the hypergraph structure underlying the chemical space Chair: Jesus Gómez-Gardeñes The big science of small networks Disentangling activity-aware human flows reveals the hidden functional organization of urban systems Multilayer stochastic block model: how do transportation options drive commuters in london? Characterising road networks through subgraph graphlet
Contributed Session 3 [Tuesday Jan. 2* Ibuka Auditorium (1F) Urban Chair: Gourab Ghoshal	Wilmer Leal, Eugenio Llanos, Andrés Bernal, Guillermo Restrepo, Duc Luu, Juergen Jost, and Peter F. Stadler 9:00-10:30] Meeyoung Cha Petter Holme 1, 2020 11:00-12:20] Riccardo Gallotti, Giulia Bertagnolli, and Manlio De Domenico Antonia Godoy-Lorite, Roberto Murcio, and Elsa Arcaute Andrew Elliott, Stephen Law, and Luis Ospina-Forero Sakil Chowdhury, Laurent Hébert-Dufresne, and Jeff	networks Exploring the hypergraph structure underlying the chemical space Chair: Jesus Gómez-Gardeñes The big science of small networks Disentangling activity-aware human flows reveals the hidden functional organization of urban systems Multilayer stochastic block model: how do transportation options drive commuters in london? Characterising road networks through subgraph graphlet analysis Effective implementation of energy aware polarization

	John Ring, Jean-Gabriel Young, and Laurent Hébert- Dufresne	Connected graphs with a given degree sequence: efficient sampling, correlations, community detection and robustness
	Jung-Ho Kim and Kwang-Il Goh	K-selective percolation on complex networks
Meeting Room 2 (3F) Dynamics 1	Takuma Narizuka and Yoshihiro Yamazaki	Burstiness for adjacency relationships in a Vicsek mode
Chair: Oriol Artime	Huijuan Wang, Cunquan Qu, and Wioletta Ruszel	Self-avoiding pruning random walk on signed network
	Sungmin Lee, Kyu-Min Lee, and Kwang-II Goh	Emergent complexity in dynamics on signed networks
	Guilherme Ferraz de Arruda, Giovanni Petri, and Yamir Moreno	Social contagion models on hypergraphs
Meeting Room 3 (3F) Epidemic	Li Pi, Ceire Costelloe, and Paul Expert	Exploring carbapenem resistant enterobacteriaceae infections in imperial college healthcare trust: a network analysis using individual patient movement data
Chair: Marko Jusup	Daniela Perrotta, Enrique Frias-Martinez, Miguel Luengo- Oroz, Daniela Paolotti, Michele Tizzoni, and Alessandro Vespignani	Harnessing cell phone traces to model the spread of Zika in Colombia
	S. Jalil Kazemitabar and Arash A. Amini	Approximate identification of the optimal epidemic source in complex networks
	Minjae Jo, Bukyoung Jhun, and Byungnam Kahng	Hybrid phase transition of simplicial SIS model in scale-free uniform hypergraph
Invited [Tuesday Jan. 21, 2020 13:	50-14:50]	Chair: Naoki Masuda
Ibuka Auditorium (1F) Invited	Shlomo Havlin	Some applications of network science
Invited	Byungnam Kahng	
Contributed Session 4 [Tuesday Jar	. 21, 2020 15:20-16:40]	
II. I . A. 114 . J. 74		
Ibuka Auditorium (1F) Innovation	Michael Park and Russell Funk	A first look at the relationship between the network of lobbying and innovation in high-tech industries
Ibuka Auditorium (1F) Innovation Chair: Sang Hoon Lee	Michael Park and Russell Funk Nagi Moriya, Tomomi Kito, and Junichi Yamanoi	
·		lobbying and innovation in high-tech industries Patent opposition network: adversarial interactions of
• •	Nagi Moriya, Tomomi Kito, and Junichi Yamanoi Andrea Zaccaria, Lorenzo Napolitano, Emanuele	lobbying and innovation in high-tech industries Patent opposition network: adversarial interactions of companies and trend of innovation Firms' complexity: technological coherence,
Chair: Sang Hoon Lee	Nagi Moriya, Tomomi Kito, and Junichi Yamanoi Andrea Zaccaria, Lorenzo Napolitano, Emanuele Pugliese, and Luciano Pietronero	lobbying and innovation in high-tech industries Patent opposition network: adversarial interactions of companies and trend of innovation Firms' complexity: technological coherence, performance, and forecasting Using network science to understand student pathways
Chair: Sang Hoon Lee	Nagi Moriya, Tomomi Kito, and Junichi Yamanoi Andrea Zaccaria, Lorenzo Napolitano, Emanuele Pugliese, and Luciano Pietronero Dion O'Neale, Steven Turnbull, and Kirsten Locke	lobbying and innovation in high-tech industries Patent opposition network: adversarial interactions of companies and trend of innovation Firms' complexity: technological coherence, performance, and forecasting Using network science to understand student pathways in and through STEM education Learning network structure using graph convolutional
Chair: Sang Hoon Lee Meeting Room 1 (3F) Inference	Nagi Moriya, Tomomi Kito, and Junichi Yamanoi Andrea Zaccaria, Lorenzo Napolitano, Emanuele Pugliese, and Luciano Pietronero Dion O'Neale, Steven Turnbull, and Kirsten Locke Nima Dehmamy, Albert-László Barabási, and Rose Yu Jean-Gabriel Young, George T. Cantwell, and M. E. J.	lobbying and innovation in high-tech industries Patent opposition network: adversarial interactions of companies and trend of innovation Firms' complexity: technological coherence, performance, and forecasting Using network science to understand student pathways in and through STEM education Learning network structure using graph convolutional networks Efficient and fully bayesian inference of complex
Chair: Sang Hoon Lee Meeting Room 1 (3F) Inference	Nagi Moriya, Tomomi Kito, and Junichi Yamanoi Andrea Zaccaria, Lorenzo Napolitano, Emanuele Pugliese, and Luciano Pietronero Dion O'Neale, Steven Turnbull, and Kirsten Locke Nima Dehmamy, Albert-László Barabási, and Rose Yu Jean-Gabriel Young, George T. Cantwell, and M. E. J. Newman	lobbying and innovation in high-tech industries Patent opposition network: adversarial interactions of companies and trend of innovation Firms' complexity: technological coherence, performance, and forecasting Using network science to understand student pathways in and through STEM education Learning network structure using graph convolutional networks Efficient and fully bayesian inference of complex networks from noisy data Inferring individual influence and susceptibility in social
Chair: Sang Hoon Lee Meeting Room 1 (3F) Inference Chair: Laurent Hébert-Dufresne	Nagi Moriya, Tomomi Kito, and Junichi Yamanoi Andrea Zaccaria, Lorenzo Napolitano, Emanuele Pugliese, and Luciano Pietronero Dion O'Neale, Steven Turnbull, and Kirsten Locke Nima Dehmamy, Albert-László Barabási, and Rose Yu Jean-Gabriel Young, George T. Cantwell, and M. E. J. Newman Fang Zhou, Manuel Mariani, and Linyuan Lü	Patent opposition network: adversarial interactions of companies and trend of innovation Firms' complexity: technological coherence, performance, and forecasting Using network science to understand student pathways in and through STEM education Learning network structure using graph convolutional networks Efficient and fully bayesian inference of complex networks from noisy data Inferring individual influence and susceptibility in social networks from multiple cascade data Tests for network cascades via branching processes
Chair: Sang Hoon Lee Meeting Room 1 (3F) Inference Chair: Laurent Hébert-Dufresne	Nagi Moriya, Tomomi Kito, and Junichi Yamanoi Andrea Zaccaria, Lorenzo Napolitano, Emanuele Pugliese, and Luciano Pietronero Dion O'Neale, Steven Turnbull, and Kirsten Locke Nima Dehmamy, Albert-László Barabási, and Rose Yu Jean-Gabriel Young, George T. Cantwell, and M. E. J. Newman Fang Zhou, Manuel Mariani, and Linyuan Lü Paolo Bertolotti, Ali Jadbabaie, and Fotini Christia Akira Ishii, Nozomi Okano, Yuki Horio, and Yasuko	Patent opposition network: adversarial interactions of companies and trend of innovation Firms' complexity: technological coherence, performance, and forecasting Using network science to understand student pathways in and through STEM education Learning network structure using graph convolutional networks Efficient and fully bayesian inference of complex networks from noisy data Inferring individual influence and susceptibility in social networks from multiple cascade data Tests for network cascades via branching processes Opinion dynamics theory including both trust and distructions.
Chair: Sang Hoon Lee Meeting Room 1 (3F) Inference Chair: Laurent Hébert-Dufresne Meeting Room 2 (3F) Dynamics 2	Nagi Moriya, Tomomi Kito, and Junichi Yamanoi Andrea Zaccaria, Lorenzo Napolitano, Emanuele Pugliese, and Luciano Pietronero Dion O'Neale, Steven Turnbull, and Kirsten Locke Nima Dehmamy, Albert-László Barabási, and Rose Yu Jean-Gabriel Young, George T. Cantwell, and M. E. J. Newman Fang Zhou, Manuel Mariani, and Linyuan Lü Paolo Bertolotti, Ali Jadbabaie, and Fotini Christia Akira Ishii, Nozomi Okano, Yuki Horio, and Yasuko Kawahata	lobbying and innovation in high-tech industries Patent opposition network: adversarial interactions of companies and trend of innovation Firms' complexity: technological coherence, performance, and forecasting Using network science to understand student pathways in and through STEM education Learning network structure using graph convolutional networks Efficient and fully bayesian inference of complex networks from noisy data Inferring individual influence and susceptibility in social networks from multiple cascade data Tests for network cascades via branching processes Opinion dynamics theory including both trust and distrusin human relations Beyond social fragmentation: coexistence of cultural diversity and structural connectivity is possible with

Meeting Room 3 (3F) Application	Larry Zhang, Nichol Castro, Trevor Cohen, and Reza Hosseini Ghomi	Probing speech generation via semantic fluency networks in aging populations as a proxy of dementia and Alzheimer's disease
Chair: Daniela Perrotta	Shilun Zhang, Matus Medo, Linyuan Lv and Manuel Sebastian Mariani	Anticipators of rising and declining popularity trends in socio-economic systems
	Cailean Osborne, Patrick Gildersleve, and Scott Hale	Navigating historical events through Wikipedia's link structure: a comparative analysis of article networks in 6 language editions
	Sudarshan Kumar, Tiziana Di Matteo, and Anindya Chakrabarti	Distress spillover on complex networks with feedback loops
Keynote/Invited [Wednesday Jan. 22, 2	020 9:00-10:30]	Chair: Tao Jia
Ibuka Auditorium (1F) Keynote	Alain Barrat	
Invited	Linyuan Lü	Vital nodes identification in complex networks
Contributed Session 5 [Wednesday Ja	n. 22, 2020 11:00-12:20]	
Ibuka Auditorium (1F) Game Theory	Soya Miyoshi, Marko Jusup, and Petter Holme	Modeling the evolution of vaccine hesitancy
Chair: Sadamori Kojaku	Xingru Chen and Fu Feng	Network-based approach to identify bridges and catalysts for persistent cooperation in the iterated prisoner's dilemma
	Jesus Gomez-Gardeñes, Clara Granell, Benjamin Steinegger, and Alex Arenas	Prevalence oscillations triggered by human prophylaxis driven by risk perception
	Alessio Cardillo and Naoki Masuda	Critical mass effect in evolutionary games on networks triggered by zealots
Meeting Room 1 (3F) Multilayer	Piotr Bródka, Anna Chmiel, Matteo Magnani, and Giancarlo Ragozini	Quantifying layer similarity in multiplex networks
Chair: Maksim Kitsak	Michael Danziger and Albert-László Barabási	Recovery coupling of multilayer networks
	Marya Bazzi, Lucas Jeub, Mason Porter, Alex Arenas, and Sam Howison	A framework for the construction of generative models for mesoscale structure in multilayer networks
	Dahae Roh and Kwang-II Goh	Entropy production in majority-vote model on multiplex networks
Meeting Room 2 (3F) Time Series and Prediction	Marcin Waniek, Kai Zhou, Yevgeniy Vorobeychik, Esteban Moro, Tomasz Michalak, and Talal Rahwan	How to hide one's relationships from link prediction algorithms
Chair: Teruyoshi Kobayashi	Tao Jia, Yijun Ran, and Xiaoke Xu	The upper bound of link prediction by the AUC measure
	Giovanni Petri and Samuel Scarpino	Path entropy identifies predictability horizons
	Michael Small and Debora Correa	Testing networks from time series: when is a network an adequate description of nonlinear dynamics?
Meeting Room 3 (3F) Robustness and Resilience	Romeil Sandhu and Ji Liu	Maxwell's demon: controlling entropy via discrete Ricci flow over networks
Chair: Zi-ke Zhang	Yang Lou, Guanrong Chen, and Lin Wang	Towards optimal robustness of network controllability: an empirical necessary condition on node degrees
	Sergio Faci-Lázaro, Jordi Soriano Fradera, and Jesus Gomez-Gardeñes	Functional resilience of cultured neuronal networks
	Yamir Moreno	Biodiversity and structural stability of multilayer ecological networks
Invited [Wednesday Jan. 22, 2020 13	50-14:20]	Chair: Hiroki Sayama
Ibuka Auditorium (1F) Invited	Manlio De Domenico	

Contributed Session 6 [Wednesday Jan. 22, 2020 -- 14:30-15:50]

Ibuka Auditorium (1F) Success	Marc Santolini, Leo Blondel, Abhijeet Krishna, Emma Barme, Megan Palmer, and Albert-László Barabási	A large scale analysis of collaboration and innovation in an international science and engineering competition
Chair: Marya Bazzi	Orsolya Vasarhelyi, Igor Zakhlebin, Stasa Milojevic, and Agnes-Emoke Horvat	Gender diversity in collaboration networks and the online popularity of scientists
	Taekho You, Jinseo Park, June-Young Lee, Jinhyuk Yun, and Woo-Sung Jung	Comparing quality of questionable journals in academic ecosystem
	Riccardo Gallotti and Manlio De Domenico	Collective effects of individual decisions the case of the Nobel prize
Meeting Room 1 (3F) Embedding	Maksim Kitsak and Dmitri Krioukov	Cross-geometric framework for complementarity-driven networks
Chair: Michael Danziger	Takeshi Hase and Masanori Shimono	Neural network embedding of real neuronal networks
	Olivier Guin, Roland Molontay, and Marcell Nagy	Comparing structural feature-based and graph embedding-based network classification methods
	Yanchen Liu, Nima Dehmami, and Albert-László Barabási	Topological characterization of 3D graph embedding landscapes using the graph linking number
Meeting Room 2 (3F) Cascade	Oriol Artime and Manlio De Domenico	Cascade-based attacks on multilayer networks
Chair: Michael Small	Tomokatsu Onaga, Fabio Caccioli, and Teruyoshi Kobayashi	Modelling fire sales as heterostate dynamical processes on bipartite networks
	Yafei Zhang, Lin Wang, Jonathan Zhu, and Xiaofan Wang	The virality and growth of cascades
	Shaunette Ferguson, Sadamori Kojaku, and Teruyoshi Kobayashi	Diurnal dynamics of financial systemic risk
Meeting Room 3 (3F) Community	Andrew Elliott, Angus Chiu, Marya Bazzi, Gesine Reinert, and Mihai Cucuringu	Core–periphery structure in directed networks
Chair: Alessio Cardillo	Vaiva Vasiliauskaite and Tim Evans	Making communities show respect for order
	Christopher Blöcker and Martin Rosvall	Mapping flow in bipartite networks
	Aditya Tandon and Santo Fortunato	Fast consensus clustering in complex networks
Keynote [Wednesday Jan. 22, 2020	16:20-17:20]	Chair: Kwang-II Goh
Ibuka Auditorium (1F) Keynote	Albert-László Barabási	Taming Complexity: From networks to brain control
